### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: A method of forming a gate dielectric is claimed which involves the coevaporation of  $\text{Al}_2\text{O}_3$  and  $\text{La}_2\text{O}_3$ .
2. Halliyal et al. show the formation of high-K dielectric materials such as  $\text{LaAlO}_3$  but do not provide fabrication details. Matijasevik et al. teach the sequential evaporation of materials that could be considered as coevaporation but show that metals and metal species can be oxidized after deposition. Danielson et al. show that both  $\text{Al}_2\text{O}_3$  and  $\text{La}_2\text{O}_3$  can be deposited with a e-gun using pellets of the materials but do not show coevaporation. Thus the claimed method is not shown in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### **EXAMINER'S AMENDMENT**

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: Claims 44 – 67, non-elected without traverse are hereby cancelled.

### ***Election/Restrictions***

4. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Art Unit: 2814

I. Claims 1 - 43, drawn to a method, classified in class 438, subclass 785.

II. Claims 44 - 67, drawn to a device, classified in class 257, subclass 410.

The inventions are distinct, each from the other because of the following reasons:

5. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the dielectric could be formed by sputtering  $\text{LaAlO}_3$ .

6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

7. During a telephone conversation with David Cochran on 9 March 2004 a provisional election was made without traverse to prosecute the invention of I, claims 1 - 43. Affirmation of this election must be made by applicant in replying to this Office action. Claims 44 - 67 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 2814
